Complete Cyber Security Solution

Worried about your baby camera getting hacked? Someone tampering with your smart speakers? Or your phone being used by hackers? Firewalla will automatically alert and protect you from all of these cyber threats, providing peace of mind in the digital world.

Contact For More Info: info@magas.services

Parenting With Ease

Firewalla lets you see what your kids are doing on his/her tablet. You'll know whether they're playing games, doing their homework, or going somewhere they shouldn't. You won't have to pull the power cord on that dusty router to limit access.

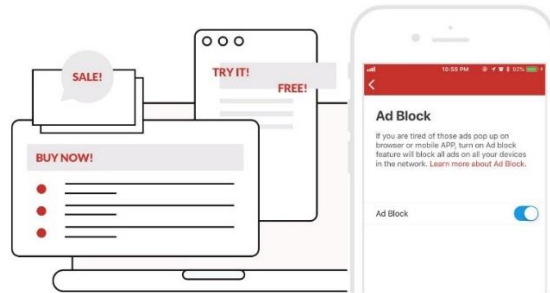

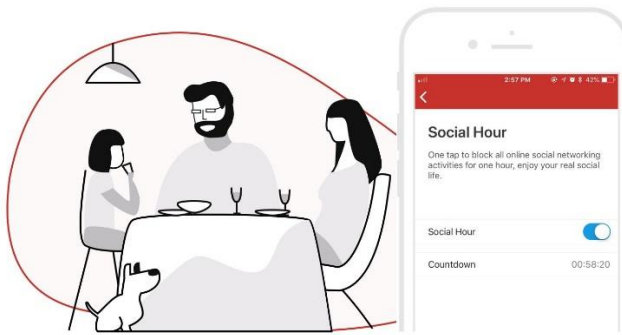

Privacy Protection: VPN

Are you comfortable sharing your private information when using Public Wifi? If not, you need Firewalla. Firewalla protect your privacy on the road, in coffee shops, or any public Wifi with our built-in VPN server! Completely FREE

Ad Block

Annoyed by those website ads? Do you know who is tracking your web browsing habits? Firewalla's built-in ad blocker can make sure you don't see ads and ads don't see you.

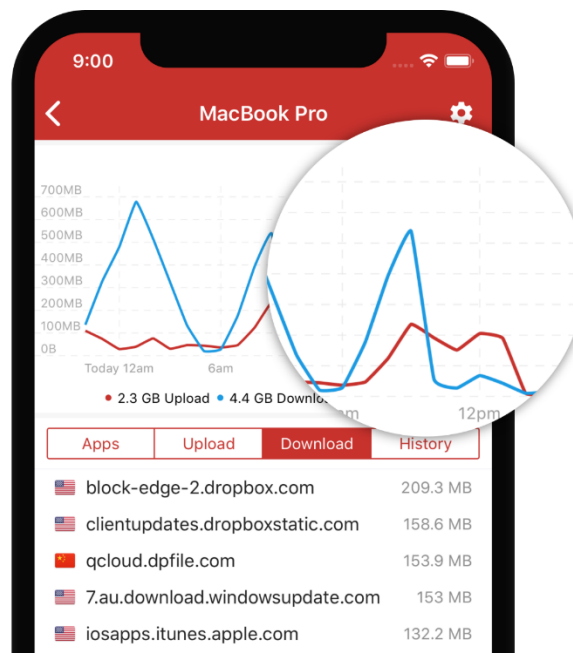

Family Time

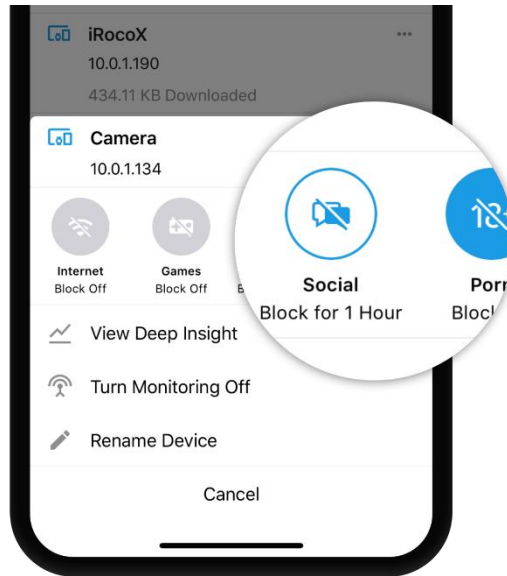

Firewalla is committed to taking back family time from social networks. One hour at a time. Our "Social Hour" feature blocks all social networks for one hour.

How Does It Work?

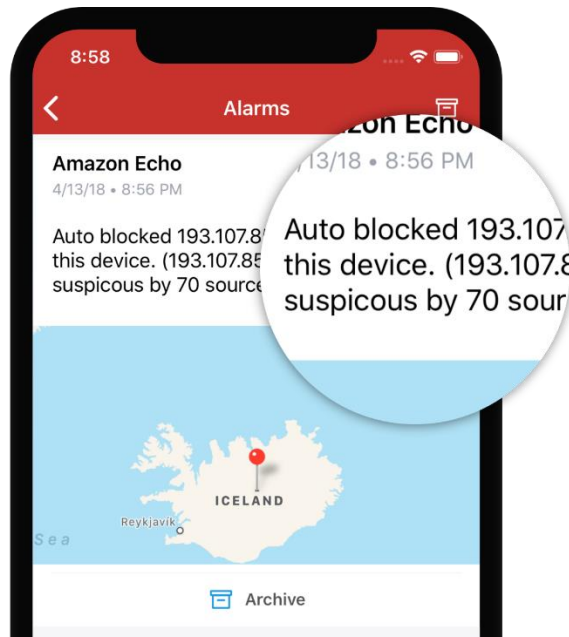

Deep Insight

Firewalla provides full visibility to your devices and networks. It can detect activities such as video, gaming, porn, malware and the ability to 'zoom' all the way to IP addresses.

In Control

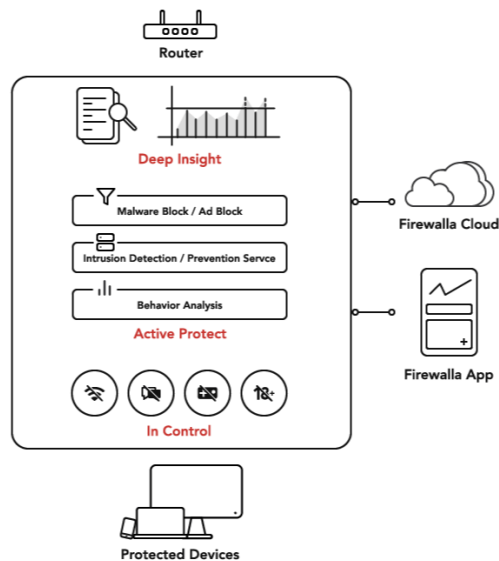

Firewalla gives you full control of your network; from blocking web pages to cutting off access to devices and even blocking ads. You will always be in control.

Protect

Firewalla is an Intrusion Detection System and Intrusion Prevention System with a modern mobile interface , and a powerful cloud.

VPN Server

"A virtual private network, or VPN, is an encrypted connection over the Internet from a device to a network. The encrypted connection helps ensure that sensitive data is safely transmitted. It prevents unauthorized people from eavesdropping on the traffic and allows the user to conduct work remotely."

Firewalla VPN Server allows you to easily set up an encrypted connection from anywhere in the world to your home. Although you are outside on public network, your security protection is just as if you are at home.

Connect to Firewalla VPN = You are at Home

Easy to setup

You don't need to open additional ports on your router.

You don't need to manually port forwarding random ports from your router to home device.

You don't need to learn complicated technology to bring up a VPN server.

One connection allows you to access all home devices.

Secure Access

Securely surfing the internet with the benefit of Ad blocking, blocking porn sites and malicious sites.

Securely accessing your home camera, NAS (network attached storage), smart door knob/power plug (IoT devices), and more.

Your own private VPN server, not shared with others.

Data Encryption

Bypass censorship and internet filtering at work or another country.

Prevent eavesdropping when you are on the road, at Starbucks.

Always at Home

Take your video subscriptions anywhere. Stream Netflix, Hulu or any service just as you are at home. No restrictions.

Access your banking / financial sites just as if you are home.

Bypass internet censorship or filtering when traveling to a foreign country.

Free

Free VPN Server runs inside your home network, there is no monthly fee or additional charge.

This VPN Server is NOT

This is not the traditional VPN service where you use to hide from your service provider.

You can not use this service to bypass Netflix restrictions. (Unless you are traveling and have a Firewall at 'home')
